TO WHOM IT MAY CONCERN

Medical Forces Command of Armed Forces of Ukraine requests to provide the humanitarian assistance in obtaining medicines and medical equipment for the needs of the Armed Forces of Ukraine.

In light of the Russian invasion and hybrid/gray zone tactics across Ukraine, medical supply is a significant problem. Many military and civilian medical facilities are under attack, others find it difficult to provide medical supplies, and others are poorly positioned as the fighting and the agility of medical equipment is absolutely key to reduce morbidity, mortality and returning combatants to the fight.

In order to best mitigate this hybrid Russian threat medicines and equipment are required.

We request your immediate support in providing humanitarian assistance.

Commander of Medical Forces
Armed Forces of Ukraine
brigadier general of medical service
